Public release date: Jan 01, 1959

DISCLAIMER

By accessing and using the Alberta Energy website to download or otherwise obtain a scanned mineral assessment report, you ("User") agree to be bound by the following terms and conditions:

- a) Each scanned mineral assessment report that is downloaded or otherwise obtained from Alberta Energy is provided "AS IS", with no warranties or representations of any kind whatsoever from Her Majesty the Queen in Right of Alberta, as represented by the Minister of Energy ("Minister"), expressed or implied, including, but not limited to, no warranties or other representations from the Minister, regarding the content, accuracy, reliability, use or results from the use of or the integrity, completeness, quality or legibility of each such scanned mineral assessment report;
- b) To the fullest extent permitted by applicable laws, the Minister hereby expressly disclaims, and is released from, liability and responsibility for all warranties and conditions, expressed or implied, in relation to each scanned mineral assessment report shown or displayed on the Alberta Energy website including but not limited to warranties as to the satisfactory quality of or the fitness of the scanned mineral assessment report for a particular purpose and warranties as to the non-infringement or other non-violation of the proprietary rights held by any third party in respect of the scanned mineral assessment report;
- c) To the fullest extent permitted by applicable law, the Minister, and the Minister's employees and agents, exclude and disclaim liability to the User for losses and damages of whatsoever nature and howsoever arising including, without limitation, any direct, indirect, special, consequential, punitive or incidental damages, loss of use, loss of data, loss caused by a virus, loss of income or profit, claims of third parties, even if Alberta Energy have been advised of the possibility of such damages or losses, arising out of or in connection with the use of the Alberta Energy website, including the accessing or downloading of the scanned mineral assessment report and the use for any purpose of the scanned mineral assessment report so downloaded or retrieved.
- d) User agrees to indemnify and hold harmless the Minister, and the Minister's employees and agents against and from any and all third party claims, losses, liabilities, demands, actions or proceedings related to the downloading, distribution, transmissions, storage, redistribution, reproduction or exploitation of each scanned mineral assessment report obtained by the User from Alberta Energy.

IRON PROSPECTING PERMIT NO. 9.

GEOLOGICAL REPORT

The total extent of the Permit is divided into two main areas, one in Township 6, Range 4, West 5th Mer. and the other in Township 8, Range 5, West of the 5th Mer. with a narrow strip ranging north & south in Townships 8 & 9 Range 4, West 5th Mer.

All of these areas were covered by Airborne Magnetometer Survey it being estimated that at least 300 line miles of flight were flown for this Permit. The results of the magnetometer survey were not considered promising enough to warrant drilling. Ground crews under the direction of engineers and prospectors failed to locate any extensive outcrops and a lot of time and labor was expended in brushcutting, making trails and cutting trenches.

With regard to the area in Tp.6-4-5 our geologist reports in August 1956. This area does not seem to warrant further investigation at present. Some very minor beds of ore have been found, these are so poor that they cannot be considered commercial. However, the area south of the Carbondale river should be examined, (our permit area lies to the north). Lack of roads, the extent of the area and the lack of water have made prospecting difficult, slow and expensive.

The area in Township 8-5-5 was also explored by our prospectors and the high spots shown on the aerial magnetometer survey were gone over by our ground crews, this is a very rugged country and at the present time it was considered that the showings did not warrant the further expense of bringing in drill crews and equipment.

All areas of this permit were again checked for outcrops by a cross-country helicopter survey last spring, no deposits were sighted which were considered good enough to warrant further expense.
