Attention: Mr. Robert Campbell

Dear Sir:

Re: Sulpher Prospecting Permit No. 4

Pursuant to your instructions we have expanded our review as outlined in the September 26, 1966 letter to include a microscopic examination of cores and drilling samples from drilled wells within the area of interest.

We regret the delay in forwarding our conclusions, however, this has been unavoidable as a number of the key wells have just now been removed from the confidential list enabling us to conclude our examination.

Since our examination of cores and samples did not detect the presence of elemental sulphur, we have terminated our study as per your instructions. In view of the results we do not recommend the added expense of editing a complete report including detailed core and sample logs.

We herewith submit the attached account with reference to the studies conducted to date.

Yours very truly,

L & M HOLDINGS LTD.
