DISCLAIMER

By accessing and using the Alberta Energy website to download or otherwise obtain a scanned mineral assessment report, you ("User") agree to be bound by the following terms and conditions:

- a) Each scanned mineral assessment report that is downloaded or otherwise obtained from Alberta Energy is provided "AS IS", with no warranties or representations of any kind whatsoever from Her Majesty the Queen in Right of Alberta, as represented by the Minister of Energy ("Minister"), expressed or implied, including, but not limited to, no warranties or other representations from the Minister, regarding the content, accuracy, reliability, use or results from the use of or the integrity, completeness, quality or legibility of each such scanned mineral assessment report;
- b) To the fullest extent permitted by applicable laws, the Minister hereby expressly disclaims, and is released from, liability and responsibility for all warranties and conditions, expressed or implied, in relation to each scanned mineral assessment report shown or displayed on the Alberta Energy website including but not limited to warranties as to the satisfactory quality of or the fitness of the scanned mineral assessment report for a particular purpose and warranties as to the non-infringement or other non-violation of the proprietary rights held by any third party in respect of the scanned mineral assessment report;
- c) To the fullest extent permitted by applicable law, the Minister, and the Minister's employees and agents, exclude and disclaim liability to the User for losses and damages of whatsoever nature and howsoever arising including, without limitation, any direct, indirect, special, consequential, punitive or incidental damages, loss of use, loss of data, loss caused by a virus, loss of income or profit, claims of third parties, even if Alberta Energy have been advised of the possibility of such damages or losses, arising out of or in connection with the use of the Alberta Energy website, including the accessing or downloading of the scanned mineral assessment report and the use for any purpose of the scanned mineral assessment report so downloaded or retrieved.
- d) User agrees to indemnify and hold harmless the Minister, and the Minister's employees and agents against and from any and all third party claims, losses, liabilities, demands, actions or proceedings related to the downloading, distribution, transmissions, storage, redistribution, reproduction or exploitation of each scanned mineral assessment report obtained by the User from Alberta Energy.

STATEMENT OF WORK PROGRAM CARRIED OUT ON QUARTZ MINERAL EXPLORATION

PERMIT NO. 63

Along with other exploration permits held by Akamina Minerals Ltd., Permit Number 63 was included in a regional prospecting program conducted during the period from July to October, 1968. The following information has been compiled from Company records and from prospectors' field notes.

The proportion of the field program conducted on permit number 63 amounted to about 16 man/days. The field program consisted of general outcrop and float (rock) prospecting supported by geochemical tests.

Access into this difficult terrain was accomplished principally via trails along Mill and Gladstone Creeks.

Areas within the permit which were particularly well prospected included: Mount Gladstone, Victoria Peak (especially north and west slopes), and the valleys of both Mill and Gladstone Creeks.

The permit area is underlain by the Appekunny, Grinnell, Siyeh, Purcell Lava, Sheppard, Gateway, Phillips, and Roosevelt formations. Folds, faults and thrusts are clearly evident, at several points in the permit area, affecting strata from within several of the above formations.

The area of greatest potential economic interest determined in the course of the 1968 field operation was found to be on the east side of Mill Creek (north-west flank of Victoria Peak). At this location, erratic copper mineralization was noted in thin beds of the Grinnell formation, and also in thin beds of the Siyeh formation.

- 2 -

In summary, it is felt that the mineral potential of this particular permit area cannot be evaluated before completion of the current year's field program.

It is conservatively estimated that the proportionate cost of the exploration program expended on permit number 63 amounted to approximately \$800.00 in 1968.
