**DISCLAIMER**

By accessing and using the Alberta Energy website to download or otherwise obtain a scanned mineral assessment report, you (“User”) agree to be bound by the following terms and conditions:

a) Each scanned mineral assessment report that is downloaded or otherwise obtained from Alberta Energy is provided “AS IS”, with no warranties or representations of any kind whatsoever from Her Majesty the Queen in Right of Alberta, as represented by the Minister of Energy (“Minister”), expressed or implied, including, but not limited to, no warranties or other representations from the Minister, regarding the content, accuracy, reliability, use or results from the use of or the integrity, completeness, quality or legibility of each such scanned mineral assessment report;

b) To the fullest extent permitted by applicable laws, the Minister hereby expressly disclaims, and is released from, liability and responsibility for all warranties and conditions, expressed or implied, in relation to each scanned mineral assessment report shown or displayed on the Alberta Energy website including but not limited to warranties as to the satisfactory quality of or the fitness of the scanned mineral assessment report for a particular purpose and warranties as to the non-infringement or other non-violation of the proprietary rights held by any third party in respect of the scanned mineral assessment report;

c) To the fullest extent permitted by applicable law, the Minister, and the Minister’s employees and agents, exclude and disclaim liability to the User for losses and damages of whatsoever nature and howsoever arising including, without limitation, any direct, indirect, special, consequential, punitive or incidental damages, loss of use, loss of data, loss caused by a virus, loss of income or profit, claims of third parties, even if Alberta Energy have been advised of the possibility of such damages or losses, arising out of or in connection with the use of the Alberta Energy website, including the accessing or downloading of the scanned mineral assessment report and the use for any purpose of the scanned mineral assessment report so downloaded or retrieved.

d) User agrees to indemnify and hold harmless the Minister, and the Minister’s employees and agents against and from any and all third party claims, losses, liabilities, demands, actions or proceedings related to the downloading, distribution, transmissions, storage, redistribution, reproduction or exploitation of each scanned mineral assessment report obtained by the User from Alberta Energy.
SUPPLEMENTARY REPORT

ON

RECENT DISCOVERIES ON THE BIG HORN CLAIM GROUP

OF

KINTLA EXPLORATIONS LTD.

IN

SOUTHWEST ALBERTA

by

Prof. Roger D. Morton, B.Sc., Ph.D., P. Geol.

Consultant Geologist
Work performed on the Big Horn claims in southwest Alberta by personnel of Kintla Explorations Ltd. during May, 1972 has yielded the following new data and information which augment previously submitted observations on the economic potentials of the Company's properties within that region.

(1) Further surface exploration and preliminary sampling of the 3 to 8 feet thick Upper Grinnell cupriferous quartzite bed which outcrops between Yarrow and Smith Creeks (reference page 8, Morton report, 1971) has revealed that the mineralized sedimentary horizon is at least 1800 feet in length along strike. Grab assays of this quartzite show concentrations of 1.0 to 2.5% Cu over true widths of up to 8 feet. Occasional grab samples of this bed have yielded assays of up to 6% Cu.

(2) The mineralized dioritic sill which outcrops between Blind Canyon and Smith Creek (reference pages 8-9, Morton report, 1971) has now been traced on surface over a total strike length in excess of 3000 feet. The average thickness of the Cu bearing mineralized sector of the intrusion has been shown to be 6 to 8 feet with occasional thickening up to 15 feet. Grab samples have assayed at 2.0 to 2.5% Cu at the extremeties of this 3000 feet mineralized portion and the central area of the intrusion's outcrop have assayed at as much as 6.48% Cu over 6 feet.

(3) Exploration in the area of claim #13 in the Big Horn group has revealed a previously unknown and promising occurrence of Pb-Ag mineralization, associated with argillaceous limestones of the Lower
Siyeh Formation. At this locality an open fold within the Siyeh limestones is cut by a younger dike. Adjacent to this dike, the limestones are extensively brecciated and cut by a stockwork of galena-bearing veins. This brecciated zone has so far been traced over an area of 40 feet by 1000 feet on surface. Initial sampling across the mineralized zone has shown 10 feet of brecciated limestone with 4.96% Pb and 0.12 oz/ton Ag, underlain by 5 feet of veined limestone with 3.38% Pb and 0.24 oz/ton Ag. A grab sample, representing a 4 feet thick, massive vein of galena which cuts the limestone breccia nearby, yielded an assay of 57.35% Pb and 2.35 oz/ton Ag.

It is therefore concluded that these new data clearly support the concept of a high economic potential for the Precambrian Belt-Purcell strata and associated intrusions within this region. The latest discovery of Pb-Ag mineralization within the rocks of the Siyeh Formation, above the Cu-Ag bearing members of the Grinnell Formation, indicate that the upper strata of the Precambrian Sequence should be considered to possess an economic potential at least equal to, if not greater than, that of the lower members of the sequence in the future.
CERTIFICATE

I, Roger D. Morton, of the City of Edmonton, in the Province of Alberta, hereby declare:

(1) That I am a registered Professional Geologist in the Province of Alberta.

(2) That I am a graduate of the University of Nottingham, England with the degrees of Bachelor of Science (Honours Geology) 1956 and Doctor of Philosophy (Geology) 1959.

(3) That I hold the tenured position of Associate Professor of Geology at the University of Alberta and also serve the mining industry as a Consulting Geologist from my office at 9103-118 Street, Edmonton 61, Alberta.

(4) That I have no interest, either direct or indirect in the properties described in this report nor any interest direct or indirect in Kintla Explorations Ltd.

(5) That this report is based upon both personal examination of most of the properties during 1969, 1970 and 1971 and upon information contained within those publications cited herein.

Respectfully submitted,

Roger D. Morton, B.Sc., Ph.D., P. Geol.
Consultant Geologist

Dated 14 June, 1972.
